Subject: M/V Western Carmen
Attachments: BUNKER DELIVERY NOTE VANINO.PDF; MSDS VANINO.ZIP

Dear Sirs,

The BDN and,

The attached BDN and Certificate of Origin/quality (called Passport in Russian, herewith attached) provided at that time of the bunker delivery, were indicating that the oil is suitable and complying with a 0.968 sulphur content, however the analysis are indicating a sulphur content of 1.17.

We concur with the recommendation from the USCG to submit a voluntary non availability Report to the EPA being not sure that the intended bunker is fully compliant with required sulphur content limits.

It is our intention to land as soon the vessel will be berthed and/or anchored at Portland roads two samples(vessel sample seal number 54390844 and another taken directly from the tank) for a new analysis.

The Marpol Sample 54390843 will remain intact and on board in Master custody.

Based on the above, we respectfully submit a "Non Availability Fuel Report"

- Vessel name : Western Carmen
- Flag: Cyprus
- IMO Nr.: 9609720
- Call Sign: 5BVZ3
- Departure Port: Nagoya (Japan)
- Date 10/03/2014 1926 Lt
